# Index to Volume 7

## Subjects

(*L*) denotes Letter to the Editor,
(*N*) short note,
(*R*) conference or exhibition report

A level physics *432(N)*
Above average pupil, The *242(N)*
Advanced level physics in a few months *407*
Algol programming *166(N)*
ASE Scottish Branch Annual General Meeting *390(R)*
Atomic physics, Contemporary aspects of *433*

BAAS Science Fair *499*
Binding Physics Education *503(N)*
Black body radiation *459(L)*
Brain teaser *36, 149, 211, 414*
Brain teaser *189(L), 190(L)*
British scientific journalese *26(N)*

Capacitance of a system of concentric spheres, The *490*
Carat—its origin as a unit of weight for diamond, The *454*
Centrifugal forces, Do, exist? *249(L)*
Cerenkov radiation *415*
Chemical education, Information on, wanted *237(N)*
Classical mechanics and the air table *338*
Classical skin effect for the undergraduate laboratory *100*
Conferences and courses, Forthcoming *64, 192, 256, 400, 464, 528*
Compact cassette tape recorders in the science laboratory *215*
Computational physics, An undergraduate course on *150*
Computer-based learning in the physical sciences *136*
Computer in physics instruction, The *143*
Computers and radioactivity *523(L)*
Computers in physics research *162*
Computing *457(L), 458(L)*
Computing and control *160(N)*
Courses for lecturers *202(N)*
Current balance, A simple *228*
Curriculum development in secondary science *242(N)*

Dangerous materials *232(N)*
Descartes, René *371*
Design of experiments and the estimation of experimental errors: a necessary preparation for project work, The *377*
Digital computer in an A level physics course, Some uses for a *155*
Doppler effect, Comment on the *425*
Double refraction in a calcite crystal *447*
Dynamics, Formulae in *250(L)*

Editorial *13, 65, 337*
Education of teachers for integrated science *47(N)*
Educational publishing, An experiment in *455(N)*
Electron diffraction in schools *363*
Electronic multiplier to measure power and energy, An *33*
Electronics for science students, Elementary practical course in *23*
Electronics for the majority *27*
'Electronics in Action' exhibition *36(R)*
Electronics in the Nuffield advanced physics course *14*
Eton boys get to know computers *157(N)*
Evaluation of a group controlled audio-visual system of programmed learning *218*
Examinations at A level, The changing scene of *203*
Experimental errors, A simple approach to *383*
Experiments in physics *522(N)*

Faraday's law paradoxes *231*
Fifty years of the BBC *481(N)*
Films, New *99(N)*
Formulae in dynamics *188(L)*
Fraunhofer diffraction patterns, Studies of *352*
Fundamental constants, Are, really constant? *411*
Fundamental particles, Chart of *211(N)*
Future of physics in schools, The *429*

GCE and SCE examinations in physics *88*
Girls still like physics *60(N)*
Guinness Awards for Science and Mathematics *406(N)*

Halley, Edmond (1656–1742) *37*
Henry, Joseph, and the American Philosophical Society *471*
History of physics in physics education, The role of the *50(R), 521*
History of physics in the physics course, Some suggestions for the use of the *53*
History of physics in the education of physics teachers, The *58*

Impact *395(L)*

Inductance bridge *189(L)*
Inertia forces, Reality of *459(L)*
Information industry: scientific writing, The *333*
Institute of Physics Acoustics Group Project Competition *79(N)*
Integrated science: a patterns approach to science teaching *45*
Integrated science studies *412(N)*
Interference patterns, Daylight viewing of *396(L)*

Joint Matriculation Board, The examining of advanced level practical physics by the *85*
'Jumping ring' apparatus, Experiments with a *238*

Lake Erie is dying, It is said *160(N)*
Lasers and molecules, Films on *217(N)*
Lever as an impedance matching device, The *509*
Liberal studies in science *87(N)*
Linkage *235*
Link scheme for electronics industry *32(N)*, *518(N)*
Looking at research *360(N)*
Looping the loop *524(L)*
Low friction mounting *525(L)*

Magnetic core memories *224(N)*
Magnetic monopoles *233*
Manufacturers' exhibition at the ASE annual meeting *167(R)*
Mathematics in education and industry: A level syllabuses *80*
Matrices in lens theory *117*
Mechanical forced oscillation system, A purely *391*
Metric diets *234(N)*
Molecular mechanism of surface tension, The *60(L)*
Mullard films, New *410(N)*
Mullard links with Sussex schools *374(N)*
Mullard wall charts *26(N)*

Names in physics *518(N)*
National Centre for School Technology *446(N)*
Nernst calorimeter, A modified *158*
New honours course for teachers of physics *12(N)*
News and comment wanted *522(N)*
Next move! *189(L)*
Newton's laws of motion *524(L)*
Non newtonian viscosity and some aspects of lubrication *193*
Nuclear magnetic resonance apparatus at low cost *107*
Nuffield A level physics *511(N)*
Nuffield physical science course, The *71*
Nuffield physicist in the university, The *66*
Nuffield physics 'packages' from Mullards, New *87(N)*
Nuffield sponsored survey of university–industry undergraduate project schemes *406(N)*
Occupation of successful candidates in the 1969 graduateship examination of The Institute of Physics *115*
One-dimensional approach to Gruneisen's constant *515*
Orbital and rotational motion of the earth, Apparatus for the study of phenomena related to the *501*
Oscillation of a wedge-shaped plate *396(L)*

Photoelastic bench, A simple *443*
Photon mass, Limits on the *419*
Physical interpretation of the Lorentz transformation *394(L)*
Physicist in industry, The *322*
Physicists in data processing, Careers for *328*
Physicists in management services in the engineering industry *332*
Physics and chemistry for sixth form teachers *242(N)*
Physics and engineering *74*, *522(N)*
Physics and mathematics *78*
Physics and poetry *129*
Physics apparatus *21*, *173*, *225*, *374*, *452*, *513*
Physics applied to medicine, Careers in *329*
Physics Centres 1972 *185*
Physics courses *257*
Physics crossword *6*,*154*
Physics education in Ghana *341*
Physics Exhibition 1972: educational exhibits *370(R)*
Physics: from school through higher education *96(R)*
Physics on stamps: Appendix III *519*
Physics teaching and the transition from schools to universities *347(R)*
Physics teaching in Australia *7*
Physics team teaching, An experiment in *174*
Plane waves, Some demonstrations of *482*
Polygon films *520(N)*
Projectors, Using *522(N)*
Project Technology 1970–2 *6(N)*
'Properties of matter' materials science, The new *172(N)*
'Properties of matter', New *520(N)*
Preparation of secondary teachers of physics in the USA, Proposals for the *111*

Queries in Physics *44*, *141*, *227*, *346*, *452*, *508*

Radioisotopes in water pollution research *348(N)*
Real phase diagrams *243*
Reflections on a Christmas-tree bauble *1*
Research into tertiary science education *505(N)*

Resources centre *346(N)*
Review, London Educational *202(N)*
Reynolds, Osborne *427*
Rutherford, Lord *170*

Safety posters *211(N)*
Scholarships abroad 87(N)
School physics teaching in India *199*
School–research laboratory liaison *401*
School–university physics interface project, The *212*
Science and people *388(N)*
Science education *418(N)*
Science in education, The place of *430*
Search *362(N)*
Seeing is believing *60(N)*
Sensible physics, Towards more *440*
Sinusoidal oscillations, The addition of *479*
Stereographic projections, A simple device illustrating *456*
Speed of light, A simple experiment to determine the *413*
SMP sixth form mathematics course, The *82*
Social responsibility and education in physics *202(N)*
Some useful fictions *506*
Sound and ultrasound *432(N)*
Sound level meter, A simple *465*
South Devon unit for science and technology education *446(N)*
Special relativity using simple geometry, Introducing *420*
Standard atmospheres, Basic formulae for *248(L)*
Stationary wave demonstrations and the quantum theory of radiation *485*
Stock and supply of physicists, The *318*
STP in SI *524(L)*
Straight edge diffraction using a laser *349*
Surface tension and capillary rise *491*
Systematic dimensional analysis *248(L)*

Teaching by television, Glasgow and Strathclyde Universities' joint report on *224(N)*
Teaching electronics in schools *61(L)*
Teaching of the concept of heat, The *41*
Teaching physics *326*
Teaching physics *184(N)*
Teaching physics in Hawaii *133*
Teaching spectroscopy *106(N)*
Teaching the concept of heat *395(L)*
Technician engineers and technicians *335*
Temperature, A logical approach to the concept of *388*
Tensile testing machine, A simple *503*
Time-lapse adapter for conventional movie cameras, An inexpensive *511*
Training courses for physics teachers *227(N)*
Training of teachers and educational technology, The *57(N)*
Twisted? *48*

Under control *426(N)*
Undergraduate physics texts 1971 *121*
University astronomy in relations to physics *103*

Electronics course at University of Essex *214(N)*

Van der Waals's equation of state and the law of intermolecular force *247(L)*
Valves and tubes *367(N)*
Visual aids *246(N)*

Why is this a bad question? *161(N)*

X ray Compton scattering *449*
X ray reflection and the Bragg equation *368*

Zone plates, Construction and some uses of *361*

# Authors/with titles

(*L*) denotes Letter to the Editor,
(*R*) conference or exhibition report

Abbatt F R, Cook G B, Hartley J R, Rawson M E and Shaw M: Computer-based learning in the physical sciences *136*
Andronov G: Industance bridge *189(L)*
Archenhold W F: GCE and SCE examinations in physics *88*
Archenhold W F: The examining of advanced level practical physics by the Joint Matriculation Board *85*
Arrigoni E A: Teaching physics in Hawaii *133*

Balchin A A: A simple device illustrating stereographic projections *456*
Bass M D: Daylight viewing of interference patterns *396(L)*
Beard D S: Electron diffraction in schools *363*
Belham N D N: A simple current balance *228*
Bennett J W, Bignell B G and Bradley R A: Some uses for a digital computer in an A level physics course *155*
Berry M V: Reflections on a Christmas-tree bauble *1*
Berry M V: The molecular mechanism of surface tension *60(L)*
Bhathal R S: Physics and poetry *129*
Bignell B G, Bradley R A and Bennett J W: Some uses for a digital computer in an A level physics course *155*
Bignell B G and Goodier J: Physics Exhibition 1972: educational exhibits *370(R)*
Billington G: Formulae in dynamics *188(L)*
Black M A: A one-dimensional approach to Gruneisen's constant *515*
Black P J and Ogborn J: The Nuffield physicist in the university *66*
Bradley R A, Bennett J W and Bignell B G: Some uses for a digital computer in an A level physics course *155*
Bullock P: Computing *458(L)*
Burge E J: Physics on stamps: Appendix III *519*

Cawthorne R G: Physics: from school through higher education *96(R)*
Chandler P E: Oscillation of a wedge-shaped plate *396(L)*
Clifton J S: Careers in physics applied to medicine *329*
Cook G B, Hartley J R, Rawson M E, Shaw M E and Abbot F R: Computer-based learning in the physical sciences *136*
Cooper M: X ray Compton scattering *449*
Cryer P: Advanced level physics in a few months *407*

Daniel P: The carat—its origin as a unit of weight for diamond *454*
Das S R: School physics teaching in India *199*
Davey P O and Grasso M N: Proposal for the preparation of secondary teachers of physics in the USA *111*
Deeson Eric: Edmond Halley 1656–1742 *37*
Dobson K I: Teaching physics *326*
Dyche G M: Computers and radioactivity *523(L)*

Eades J A: Systematic dimensional analysis *248(L)*
Edgar F L: Low friction mounting *525(L)*
Edwards S J and Knowles B G: Matrices in lens theory *117*
Ericson T J:Nuclear magnetic resonance apparatus at low cost *107*
Eyeions D A: Careers for physicists in data processing *328*

Fairbrother R W: The changing scene of examinations at A level *203*
Flowerday P L: The stock and supply of physicists *318*
Foxcroft G E: Electronics in the Nuffield advanced physics course *14*
French J C R: Physicists in management services in the engineering industry *332*

Gardiner E D: Physics teaching in Australia *7*
Gauld C F: Next move! *189(L)*
Gee B: Some suggestions for the use of the history of physics in a physics course *53*
Gee B: The role of the history of physics in physics education *50(R)*, *521*
George S: Straight edge diffraction using a laser *349*
Gillespie E S: Osborne Reynolds *427*
Gingell A C: Technicians engineers and technicians *335*
Goldsmith C C: The SMP sixth form mathematics course *82*
González C: Do centrifugal forces exist? *249(L)*
Goodier J: Editorial *13*, *65*, *337*
Goodier J: The future of physics in schools *429*
Goodier J and Bignall B G: Physics Exhibition 1972: educational exhibits *370(R)*
Gore M M and Rayner J P: Compact cassette tape recorders in the science laboratory *215*

Gori E G, Petriconi G L and Papee H M: An inexpensive time-lapse adapter for conventional movie cameras *511*
Gough W: A simple experiment to determine the speed of light *413*
Graham G R: Studies of Fraunhofer diffraction patterns *352*
Grasso M N and Davey P O: Proposal for the preparation of secondary teachers of physics in the USA *111*
Greaves C: Occupation of successful candidates in the 1969 graduateship examination of The Institute of Physics *115*
Gross W E: Joseph Henry and the American Philosophical Society *471*

Hall W C: Integrated science: a patterns approach to science teaching *45*
Hanna P B and O'Neill F R: Comment on the Doppler effect *425*
Hansen O P: Classical skin effect for the undergraduate laboratory *100*
Hartley J R, Rawson M E, Shaw M, Abbatt F R and Cook G B: Computer-based learning in the physical sciences *136*
Hawes J L: René Descartes *371*
Heath N E: Teaching the concept of heat *395(L)*
Helm H: Van der Waals's equation of state and the law of intermolecular force *247(L)*
Helsdon R M: A logical approach to the concept of temperature *388*
Helsdon R M: Basic formulae for standard atmospheres *248(L)*
Helsdon R M: Formulae in dynamics *250(L)*
Helsdon R M: Impact *395(L)*
Helsdon R M: Reality of inertia forces *459(L)*
Henderson W M: Black body radiation *459(L)*
Hersee John: Mathematics in education and industry: A level syllabuses *80*
Hillier K W: The physicist in industry *322*
Hinson D J: Newton's laws of motion *524(L)*
Hughes P F: Electronics for the majority *27*

Jackson A T: Cerenkov radiation *415*
Jackson G: Physics and engineering *74*
Jacobs D J: Lord Rutherford *170*
James M F: Linkage *235*
Jarvis W H: ASE Scottish Branch Annual General Meeting *390(R)*
Jarvis W H: BAAS Science Fair *499(R)*
Jarvis W H: 'Electronics in Action' exhibition *36(R)*
Jarvis W H and Jenkins J: Manufacturer's exhibition at the ASE annual meeting *167(R)*
Jarvis W H: Physics teaching and the transition from schools to universities *347(R)*
Jenkins J and Jarvis W H: Manufacturers' exhibition at the ASE annual meeting *167(R)*
Jevons F R: The place of science in education *430*
Jones A: The information industry: scientific writing 333
Jones A R, Kowal A and Wooding E R: Construction and some uses of zone plates *361*
Jones J: Twisted? *48*

Keyes O B: Brain teaser *190(L)*
Knott R G A: Contemporary aspects of atomic physics *433*
Knowles B G and Edwards S J: Matrices in lens theory *117*
Kowal A, Jones A R and Wooding E R: Construction and some uses of zone plates *361*
Krans R L: The history of physics in the education of physics teachers *58*

Ladd M F C: X ray reflection and the Bragg equation *368*
Lafferty P E: Physics Centres 1972 *185*
Leckey R C G: An elementary practical course in electronics for science students *23*
Le Marne A E: Evaluation of a group controlled audio-visual system of programmed learning *218*
Lewis R: Computing *457(L)*

MacInnes I: The lever as an impedance matching device *509*
McClelland G: Physics education in Ghana *341*
McD Wood C F: A simple sound level meter *465*
Morgan R: A simple tensile testing machine *503*
Morris D A: Apparatus for the study of phenomena related to the orbital and rotational motion of the earth *501*

Nicola M: Physical interpretation of the Lorentz transformation *394(L)*
Nussbaum A: Faraday's law paradoxes *231*

Ogborn J with Black P J: The Nuffield physicist in the university *66*
O'Neill F R and Hanna P B: Comment on the Doppler effect *425*
Ong P P: A purely mechanical forced oscillation system *391*

Papee H M, Gori E G with Petriconi G L: An inexpensive time-lapse adapter for conventional movie cameras *511*

Petriconi G L, Papee H M with Gori E G: An inexpensive time-lapse adapter for conventional movie cameras *511*
Phillips M D: A simple approach to experimental errors *383*

Rawson M E, Shaw M, Abbatt F R, Cook G B and Hartley J R: Computer-based learning in the physical sciences *136*
Rayner J P and Gore M M: Compact cassette tape recorders in the science laboratory *215*
Richards D A: Double refraction in a calcite crystal *447*
Richards D A: Some demonstrations of plane waves *482*
Roberts A R: Classical mechanics and the air table *338*
Roche J: Some useful fictions *506*

Saunders I J: Introducing special relativity using simple geometry *420*
Scammell R: Looping the loop *524(L)*
Shaw M, Abbatt F R, Cook G B, Hartley J R and Rawson M E: Computer-based learning in the physical sciences *136*
Sherman H J: An undergraduate course on computational physics *150*
Smith K F: Stationary wave demonstrations and the quantum theory of radiation *485*
Somerville W B: University astronomy in relation to physics *103*
Spice J E: The Nuffield physical science course *71*
Squire P T: Brain teaser *189(L)*
Stanley G: A simple photoelectric bench *443*
Stanley R C: Non newtonian viscosity and some aspects of lubrication *193*
Stephenson R J: Teaching electronics in schools *61(L)*
Sumner D J and Thakkrar A K: Experiments with a 'jumping ring' apparatus *238*
Sutton R A: The School–University Physics Interface Project *212*
Swetman T P: Are fundamental constants really constant? *411*
Swetman T P: Computers in physics research *162*
Swetman T P: Limits on the photon mass *419*
Swetman T P: Magnetic monopoles *233*
Swetman T P: The computer in physics instruction *143*

Tawney D A: The design of experiments and the estimation of experimental errors: a necessary preparation for project work *377*
Thakkrar A K and Sumner D J: Experiments with a 'jumping ring' apparatus *238*
Thurstans R E: The addition of sinusoidal oscillations *479*
Tomes D: Physics and mathematics *78*
Trinogga L A: An electronic multiplier to measure power and energy *33*

Walton A J: Surface tension and capillary rise *491*
Ward E H: STP in SI *524(L)*
Warren J W: The teaching of the concept of heat *41*
Watson A A: The capacitance of a system of concentric spheres *490*
Welch P A: An experiment in physics team teaching *174*
Winans J G: Towards more sensible physics *440*
Wooding E R, Jones A R and Kowal A: Construction and some uses of zone plates *361*
Woolnough B E: School–research laboratory liaison *401*
Wray E M: Real phase diagrams *243*
Wright S J: A modified Nernst calorimeter *158*
